About This Content

This stunning train has been upgraded to give you the best experience. The Nickel Plate has had its Train Motion settings tweaked to mimic realistic behaviour using the new Train Motion system in TANE.

In addition to this, you can now play the brand new driving session created for this train. This means you can find the Nickel Plate train located in the Kickstarter County session menu. That isn't to say you can't go and place it in Surveyor yourself like before, but we thought some of you will want to just get in and drive!

Relive the halcyon years of steam hauled freight services in the US with this stunningly modeled Trainz Simulator addon.

This DLC pack includes the following:

New York, Chicago & St. Louis / 'Nickel Plate Road' Class S-2 2-8-4 locomotive in early and late condition

Pere Marquette Class N-1 2-8-4 locomotive in 'as preserved' condition

NKP 40' Boxcar

NKP 400 Series Bay Window Caboose

Features Include:

Custom 3d Locomotive Interior.

Custom 3d Caboose Interior.

Animated ringing bell, including bell lever controls in locomotive cab.

Configurable classification lights and flags.

Automatically assigned prototypical vehicle numbering for Locomotive, Boxcar, and Caboose.

Tender automatically displays the running number.

Automatic tail light on rear of tender.

Automatically configured end of train flags (day), marker lamps (night) and a lantern for backing up on the Caboose.

Interior of Caboose is lit at night.

Train crew will board / alight from caboose at the crew depot.

Automatic brake hose connection on all vehicles using the ACS standard.

Boxcar loads palletized goods by default, other loads configurable in surveyor.

Boxcar doors are animated and will open when loading and unloading products.

Memory: 4 GB RAM

Graphics: NVIDIA GT 430 or better/ AMD ATI 5550 or better

DirectX: Version 11

Storage: 250 MB available space

English,French,Italian,German,Russian

The Steam Engine and Tender Metal Textures look very good and are High in Quality.

The Lighting effects are not Quality.

Headlight has a Cardboard looking Cone projecting forward, Alpha Layers not set correctly.

Rear Red Tail Lamp overly Bright and unrealistic looking, Side Cabin Lamps the same, overly Bright with too much Halo around them.

Can not Edit the Texture files for the Headlight to Fix. No Owner Rights to Change anything.

DLC is not worth the Purchase as you never own it to be able to fix the Developers's errors.
